Ultima

Quest of the Avatar

ASPIRING AVATARS

Before you lies the difficult road to Avatarhood. Its path is filled with peril and strife far beyond the tests of battle. Never forget that the Avatar is a champion. If you succeed in completing this quest, you will find its rewards truly great. I wish you well, and good luck on thy journey.

Lord British

One fine day, you wander from the city to rest in a meadow near a gently flowing stream. Finding a comfortable shade tree, you lie down and let the sound of the singing birds and babbling water wash from your mind the clutter and clatter of the city. A breeze brings you the scent of the open land as you sink into a dream.

PROLOGUE

Suddenly a shrill sound like a scream pulls you to your feet. You see before you a swirling maelstrom. Increasing in size, it begins to near you, pulsing as if to grab and pull you near. Just as it is about to touch you it suddenly shrinks and fades. Then with a bright flash, it disappears, dropping a shiny object to the ground.

Cautiously, you approach the object. It is a gold cross with a ring on top. Carefully you pick it up. It is an "Ankh". Suddenly there is a flash of light and a covered wagon appears.

Slowly you approach the back of the wagon. Through a gap in the covering you see a lone figure. "Please, enter," the figure says with a wave of his hand. With some apprehension, you enter the wagon. "I see you have found the

Ankh, the symbol of life and resurrection," says the stranger, "It was by it I have been summoned." "Who are you?" you ask. "I am Hawkwind, the fortuneteller," he replies, "I have been sent to guide you on your path." With those words he draws from beneath a cloth a set of cards. "Now choose your path."

CHAPTER 1

**BASIC
INSTRUCTIONS**

TIME TO BEGIN YOUR QUEST

The stage is set and you are now ready to have Hawkwind uncover your path. Follow the instructions below in order to begin your game.

Properly insert your Ultima Game Pak into your Nintendo Entertainment System and turn on the power. When the Ultima title screen appears, (Fig. A), press the START Button. Two commands will be shown on the screen, "Play Game" and "New Game", (Fig. B). If you are playing for the first time, use the UP and DOWN Arrows to move the cursor to the "New Game" selection and press the A Button. The next screen will show slots for Games 1-3, (Fig. C), allowing you to have three different games saved at the same time. Select one of the slots by using the UP and DOWN Arrows to move the cursor and press the A Button when the desired slot is indicated. The game will then ask you to select your desired speed. The speed refers to how fast you read the screen message. Speed 9 indicates the fastest typing speed, while Speed 1 will give you the slowest speed. Use the LEFT and RIGHT Arrows to move the cursor to the desired speed and then press the A Button to select it.

E

You are now ready to enter the name of your character. Use the Control Pad to move the cursor to the desired letters and press the A Button to enter them. Use "BSC" to Backspace for corrections and select END when you have finished naming your character.

CONTINUING AN ADVENTURE

To continue a game already in progress, select the "Play Game" option on the second screen, (Fig. B, Pp. 6). Move the cursor to the name of the game you wish to play and press the A Button. The game will return to the last position where it was saved. You will then be able to continue playing.

HOW TO ERASE A GAME AND OPEN ANOTHER GAME SLOT

Should you wish to erase a game in progress, select the "Play Game" option on the second screen (Fig. B Pp. 6). Using the cursor, select the name of the game you wish to erase and press the A Button. The next screen will give the choice of three commands. Again, using the cursor select the ERASE GAME command and press the A Button. The game will then ask you if it is okay to erase this game. If you press the A Button it will give you the option of yes or no. If you chose yes, that game will be erased and return to the game selection screen.

YOUR CHARACTER CLASS IS BASED ON YOUR FORTUNE

Hawkwind will tell your fortune by asking you a series of questions. Each time you see a flashing cursor on the screen, press the A Button to continue the question. As each question is completed a second window with your possible answers will appear. Chose the answer that best suits the question. There are eight different character types in Ultima, and your answers to the questions will help select a character closest to how you feel. When all the questions have been answered, your newly created character will be brought before Lord British to begin his challenging quest.

YOU BECOME YOUR CHARACTER

From this moment on, you and your character are one. You will start with a certain number of items and abilities varying with the class of your character. For example, if you are a Bard, your starting level is 3, and you start with cloth armor, a sling, some magical ingredients, and some money. Had you started with a different character, the list may be dramatically different. Study the Starting Data to learn more about your new character and what he can do to get a better start in the game.

This character starts in the city of Moonglow, known for Honesty. She is one of the most skilled characters in the ways of magic. As a result, she wears cloth armor and has light weapons.

"GO FORTH NOW, AND CONQUER THE FRONTIERS OF THY SELF!" SAYS LORD BRITISH

As Hawkwind had foretold the character into which you have been transformed appears before the King of Britannia, Lord British. After listening to his words, you will leave him and be warped just outside of your character's home town. Be sure to talk to everyone at Lord British's before you leave. You never know what you may learn. To learn more of your quest, study the history of Britannia.

THE HISTORY OF BRITANNIA

The 1st Era of Britannia's Dark Age (ULTIMA I)

The evil wizard Mondain attempts to destroy Lord British's young country of Britannia. By spreading distrust and hatred amongst the old city-states of the Kingdom, the Union is almost dissolved and Chaos nearly gains control. Lord British sends forth his mightiest warrior and Mondain with his rebellion is defeated.

The 2nd Era of Britannia's Dark Age (ULTIMA II)

After the fall of Mondain, his apprentice Minax, a witch of considerable power, begins a reign of terror. The Kingdom is nearly torn apart as peace and happiness are lost. Lord British once again summons his champion to defend the land, and Minax is defeated.

Britannia's Age of Reason

(ULTIMA III)—known as [ULTIMA-EXODUS, for the N.E.S.]

Twenty years after the fall of Minax, peace and prosperity rule the land. Still, hidden from Lord British, a group of evil magicians wait for the ill-omened star of Exodus to release a giant serpent from deep within the ground. Fearing for his Kingdom, Lord British summons four of his bravest warriors. After a difficult battle, they defeat the serpent and the Kingdom is rescued.

Now, peace again rules the Kingdom. Wary of the past, Lord British has called forth the best people of his Kingdom, to seek the order of Avatarhood. He knows that the Avatar can defend the Kingdom and guide the people from the path of injustice. The eight virtues of Avatarhood represent the most difficult quest. Often the aspirant will find that the most difficult enemy is often, himself. Even now, the people wait, doing penance and praying for the coming of the one worthy of the title of Avatar. Follow your heart, and find the way.

HOW TO USE THE COMMANDS

To access the various play commands, press the A Button during play. A window with the play commands will appear. Use the Control Pad to move the cursor to the command you wish to exercise and again press the A Button. Should you change your mind, press the B Button to cancel it and you will return to the previous menu.

PARTY DATA

*If a character has been poisoned, a (P) will appear after the character's class.

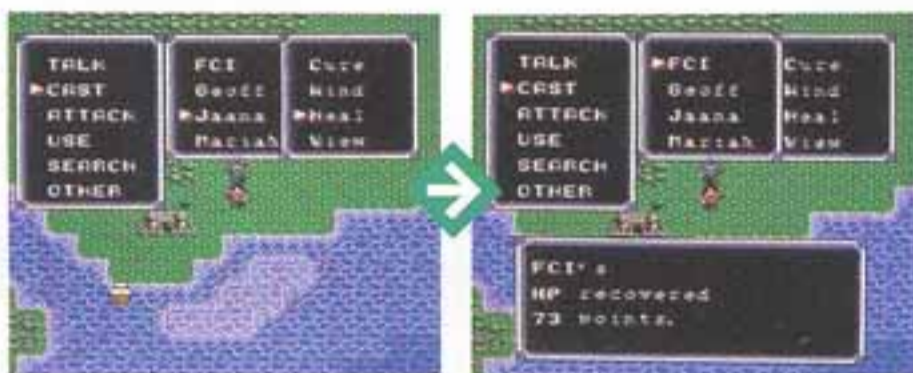

1 TALK

Use this command when you wish to speak to a character on the screen. Make sure that your character is facing the character you want to communicate with and you are immediately adjacent to them. You can also talk over counters. Talk is not available in battle scenes.

2 CAST

This command is used when you wish a character to cast a spell. When Cast is selected, the names of the party members will appear. Choose the character you want to cast the spell and press the A Button. Next a list of the spells that you may select from will appear. By using the Control Pad you can move the cursor to the spell you would like and then press the A Button to cast it. If for some reason you can not cast a spell, the reason why will appear in a window.

3 ATTACK

You may use this command to attack a character (if you wish). You must move up to the character you wish to attack, face it, then press the A Button. When the command window appears, use the Control Pad to move the cursor to the Attack command and then press the A Button. The game will then bring up the Battle Window where you may select the battle command you wish to use.

(LAND)

This command is used when you wish to land a particular object. It will only work on the open plains and an appropriate object.

4 USE

This command will allow you to use one of the items from the party's supplies. When the command window is selected, use the Control Pad to move the cursor to the Use command and press the A Button. A window with the available items will appear. Select the item you desire and press the A Button to activate it.

5 SEARCH

With the Search Command the player is able to search the spot where the party leader is standing. This command is also used to pick up items that are lying on the ground. To find things, you need not always look in a town or a Dungeon.

6 OTHER

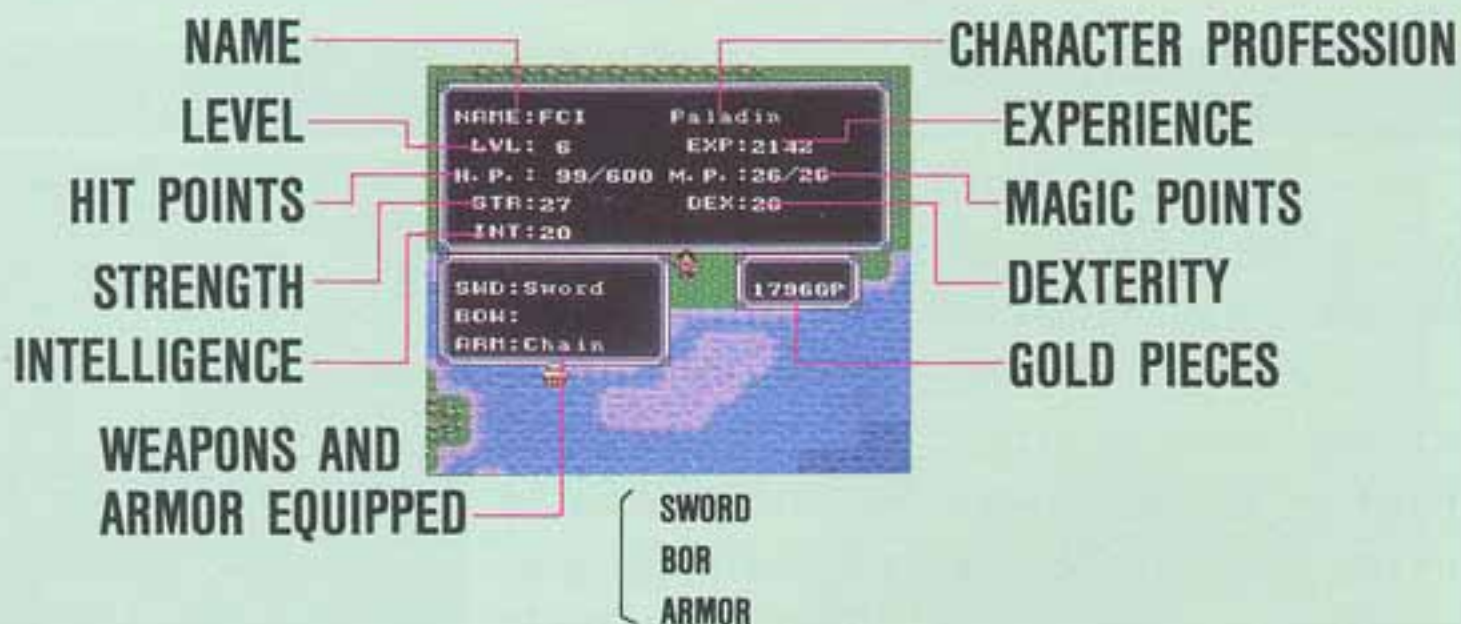

The Other Command is used to access a second menu screen containing most of the maintenance functions for the party. Here the player may ready weapons, check herbs, runes, stones, magic recipes, and change the marching order of the party.

A) STATUS

With the Status Command you may check your party members' condition and the items they have. When selected, two windows will appear; one with the party members, and the other indicates the virtues they have attained. To look at a individual member in depth, move the cursor with the Control Pad to the member you wish and press the A Button.

The Individual Status Screen

Name shows the Character's Name. Level shows the Character's current level based on accumulated Experience. Hit Points indicate the character's current health level; at zero the character expires. Strength indicates offensive attack strength. Intelligence influences the success of an attack. Armor and Weapons show the currently equipped armor and weapons of the character. Magic Points show casting points available. GPs show the amount of accumulated party wealth. Experience shows total points gained. Character Class shows the character's profession.

B) READY

The Ready Command allows the player to change the weapon or the armor the character is currently using. To change or equip yourself with a character, use the Control Pad to select the item you wish to equip yourself with and press the A Button. A Star next to the item means you are equipped.

There Are Two Types Of Weapons

Generally there are two types of weapons: Projectile and Hand-Held. Projectile weapons such as slings and bows “shoot” enemies from a distance. Hand-Held weapons require the character to get right next to an opponent to attack.

C) HERBS

The Herbs Command shows you an inventory of the herbs the party is carrying. The inventory list shows the number of “doses” for each herb. Each time a spell is cast, the proper number of herbs will be subtracted.

D) RUNES

Each of the Runes corresponds to a Virtue. For each Rune that the party possesses, there will be a Virtue in the window when this function is selected. If no Runes are possessed this will also be indicated.

E) STONES

Each Stone is identified by a separate color. The colors of the Stones that the party possesses will appear in the window when this function is selected. As with the Runes, if no Stones are possessed this will also be indicated.

F) RECIPE

When this function is selected, the list of available spells will appear. By using the Control Pad to move the cursor and pressing the A Button to select the spell, the herbs needed to cast the spell will be displayed. Use this to keep track of which herbs you need the most.

G) ORDER

With the Order Command the player may rearrange the marching order of the party. The main character is the leader and must always remain up front, but the rest of the party may be

changed. Move the Control Pad to place the cursor on the character's name who you wish to be second in line, and press the A Button. You cannot change the marching order of your characters in the middle of a battle.

EACH TOWN CONTAINS MANY IMPORTANT BUILDINGS

Without the services provided in each town, the quest of Avatarhood would not be possible. Search through each town very carefully. Many secrets are there to be found.

INN

It is a place where the party can rest and recover some of its lost Hit Points and Magic Points. It is also a place where you can save your game. When you wish to restart a game that you have saved, this is the spot where you will resume play. You will have three options to choose from. You may stay and not save, stay and save your game, but continue to play, or stay, save your game, and stop playing for the day.

HOW TO STOP THE GAME

If you want to stop playing and turn off the game, answer "No" when the character at the register asks you if you wish to leave in the morning. Heed well the warning about pressing in and holding the Reset Button when shutting off the power. This will protect the game's memory from an accidental loss. When you play later, this is where you'll start.

PUB

The Pub is a gathering place for travelers of many sorts

and also a great place to gather information. For the right amount of tip, you never know what you might find out. Use the Control Pad to select the amount you wish to give to the Barkeeper and press the A Button.

WEAPON AND ARMOR SHOP

In these shops the player may improve the equipment of his party by purchasing better items than they started with.

Shop around because the items do vary from town to town. You may also sell your extra items here.

GUILD

The Adventurer's Guild is where the party may go to purchase items necessary for your explorations.

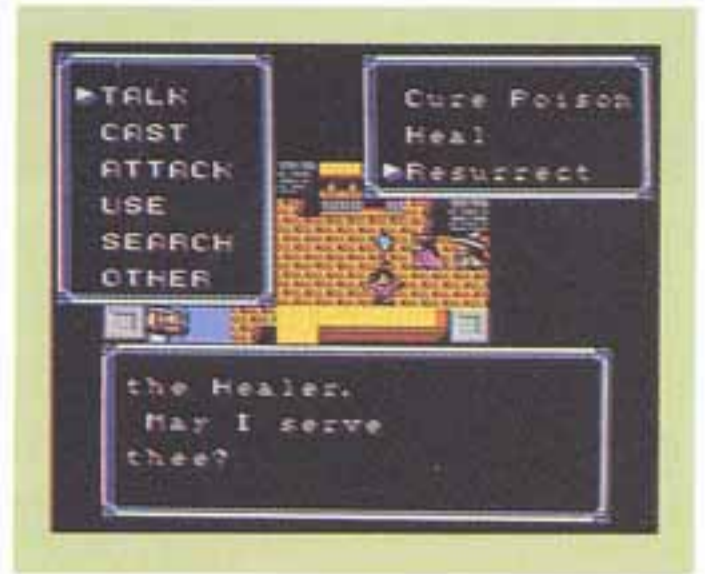

Be sure you purchase enough of them. You may get easily lost without them.

HEALER

Here you may bring your wounded party members to have them Healed, Resurrected, or Cured if necessary. The Healer will charge for his service. Be sure to seek information here also.

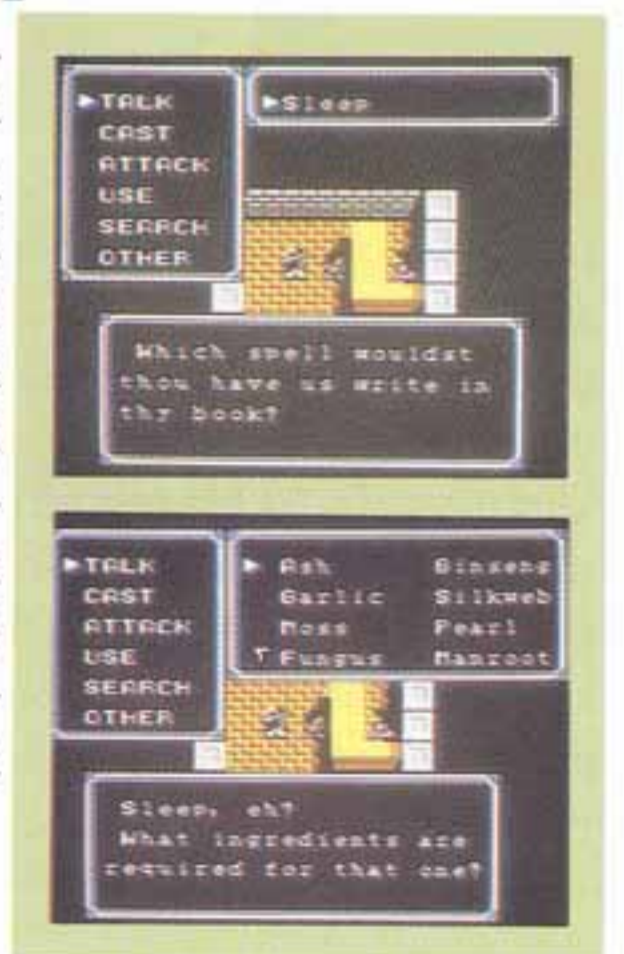

HERB SHOP

This shop sells the herbs that are necessary for casting magic. You pay for the herbs just like you pay for drinks at the Pub. Be sure to stock up when you can. An herb shop is not found in every town.

MAGIC BOOK SERVICE

As you travel about Britannia, you will find characters who will give you information about various spells. Be sure to write down the ingredients they tell you. When you come to Moorglow where there is a Book Service, you may have the spell entered into your spell list. By pressing the A Button to talk to the Scribe, a list of the spells will appear. Select the spell. You will then be asked what the ingredients of the spell are. Once listed, you will be able to use the spell.

THE CASTLE BRITANNIA IS AN IMPORTANT BASE!

The Castle Britannia is located at the center of the world of Britannia. Here you will find many services that will assist you on your quest. It is good often to check in with Lord British for new levels and some helpful tips.

CASTLE BRITANNIA HOSTEL

One of the goals of the Avatar is to gather the seven companions. Only four of these characters may travel with you at a time. The others will wait here for you. You may return and change the party members at any time.

HAWKWIND'S ROOM

To reach Avatarhood you must master the eight Virtues. Each time you act properly, your Virtue level will rise. If you act against the Virtue, the level will fall. If you are uncertain as to whether or not you have attained the highest level in a Virtue, talk to Hawkwind. He will tell you whether or not you have attained the proper level for Avatarhood. If you have not, he will not tell you why. This is the purpose of the quest; to find the Virtues by deeds alone.

KNOW YOUR LANDSCAPE!

The various different types of terrain in Britannia affect the speed at which the party may move, and the distance they may see. Some areas of the map may appear “blacked out” indicating a visual obstruction.

CASTLES/TOWNS	STAIRWAYS
 <p>They may be found in many places. To enter, walk in to them.</p>	 <p>To utilize Stairways walk onto them. You will automatically go up or down.</p>
DUNGEONS	SHRINES
 <p>Like Towns, you enter them by walking on top of them. Great danger lurks here.</p>	 <p>Again like Towns. Only those who are worthy may enter these sacred halls.</p>
PLAINS/BUSHES/PLATEAUS	FORESTS
 <p>They do not impede the party's movement. Some strong monsters are here.</p>	 <p>Your sight is limited here. Forests will also slow you down.</p>
POISON SWAMPS	MOUNTAINS
 <p>The Dead Man's Swamp. With each step you may be poisoned. Be careful.</p>	 <p>You can not walk on the mountains. It will also block your sight.</p>

BLACK OUT

As previously mentioned some parts of the map cannot be seen. This represents limited visibility. You can always see a character's width away in deep forest.

USING THE BATTLE COMMANDS

Peace reigns in the more settled parts of Britannia, but the wilderness still abounds with danger. As the party travels, the members may be set upon by fierce beasts and creatures of great magical powers. When the party is attacked by hostile monsters or when the Attack Command is selected, the Battle Screen will appear. By using the Control Pad to move the cursor, and the A Button to activate the command, the party may defend itself. Each time the Battle Screen appears, it represents one full combat turn. At the conclusion of each turn, the screen will return. If you wish to cancel a command, press the B Button. By continually pressing the B Button you can “back” your way through the entire party’s commands.

The Battle Screen

LIST OF BATTLE
COMMANDS

PARTY'S
CONDITION

BATTLE
DESCRIPTION

1 AUTO

This command lets the computer decide what the character should do. Often the computer will execute the last command that you input repeatedly. Rarely will the computer use the projectile weapons or magic spells.

2 ATTACK

If the character is within range for a Hand-Held attack then the character will use a Hand-Held weapon. If the character is out of range he will use a projectile weapon. If the projectile weapon is used, a target box will appear on the screen. Use the Control Pad to move the box onto the enemy you wish to attack and press the A Button. A character that has no projectile weapon will automatically attempt to get closer to the enemy to use his Hand-Held weapon.

3 CAST

When the Cast Command is selected, the list of spells will appear. The player should then select a spell using the Control Pad and the A Button. Once the spell has been selected, the player will select the enemy target by using the Control Pad to move the target box on the screen as with the projectile weapon. The target box will not appear if the party does not have enough herbs for the spell. In this case, a message saying that there are not enough herbs will appear indicating that the ENTIRE party does not have the herbs.

4 USE

This command allows the party to use any of the items that the party is carrying. It works exactly like the Use Command from the Play Command list. Use the Control Pad to move the cursor to the item you wish the character to use and press the A Button.

5 MOVE

If the Move Command is selected, an arrow will appear next to the party member. By moving the Control Pad, you can move the arrow to point in any of four directions to which the character will move. Enter the command by pressing the A Button.

How To Retreat

Occasionally the party may find flight better than fight. To retreat from combat, use the Move Command to move the character off ANY edge of the screen. Each character must retreat off the screen individually to be safe. Be careful, retreating can lower your Virtue level.

THE MONSTERS OF BRITANNIA

Although most of the evil was purged from the land of Britannia, the vast wilderness still left places for it to hide. These remnants of the long lost powers of darkness continue to grow, seeking their revenge on those who defeated them. Some of the monsters can use magic or arrows. They appear in groups of their own kind, and sometimes, mixed in order to gain more strength. Often your valiant party will be out numbered. Use your noble companions well.

THE MYSTERY OF THE MACABRE DUNGEONS

Scattered about the land of Britannia, there are eight bizarre Dungeons. Each of the Dungeons is eight levels deep. They are represented in 3D views, with the direction you are facing and current level of depth constantly displayed. Ladders connect the floors, but they are hidden in the dark that you must cut with magic or torch. Monsters are abundant here and are safe from the champions of the surface world. Who would dare enter their domain and why?

PARTY'S
CONDITION

MOVING ABOUT THE DUNGEON

To move in the Dungeon use the Control Pad. Up will move the party forward in the facing direction. Left and Right will execute turns in the corresponding direction. Down will move the party backward.

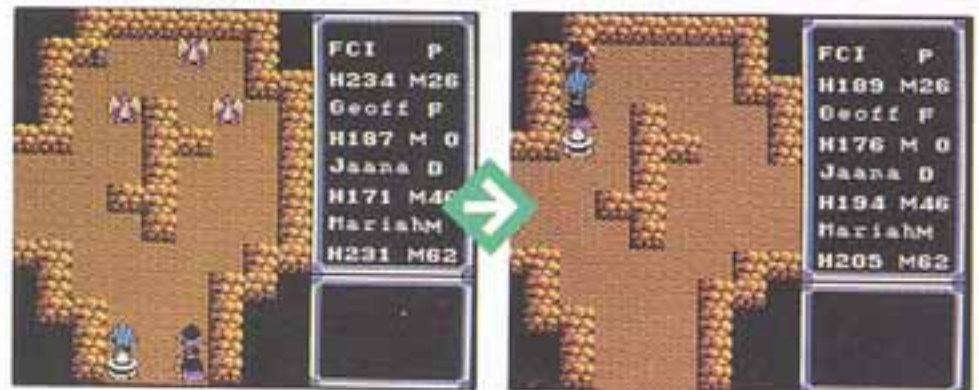

LADDERS

Ladders are used to change levels vertically. Whenever the party reaches a ladder, the game will ask whether the party wishes to use the ladder or not. Use the Control Pad and the A Button to answer.

MYSTERIES OF THE SECRET ROOMS

Hidden in the Dungeons are several secret rooms. Many of these rooms will move you to a Battle Screen as soon as you enter them. To find these rooms, be sure to search the walls. Often a wall that appears to be nothing, can be something. Dead ends are also good places to look.

TREASURE CHESTS AND SPRINGS

Throughout the Dungeons you may find Treasure Chests and Water Springs. You may open the chests or drink from the Spring with the Search Command. Whether the effects of drinking from a Spring are good or bad are up to the brave and the foolish to find out.

JEWELS

In some places in the Dungeons you will find a Jewel mounted in a silver holder. Touching it may raise an Attribute by 5 points. The effect of raising an Attribute may be anywhere from 200 to 800 points of damage to the character depending on which Attribute is raised. Be sure the character can survive the shock before he touches it or he may be destroyed.

STONES ARE HIDDEN IN THE DUNGEONS

To complete the quest of Avatarhood, the player must find the Stones that correspond to the Eight Virtues. The Stones vary in color and most are well hidden within the depth of the Dungeon. Search well and prepare. It is unlikely that you will find them unguarded.

ALTAR ROOMS

Down within the lowest depths of the Dungeon you will find the Altar Room. The room, by legend, is said to possess great power and a special function. The Altar Rooms are related to the principles of Love, Truth, and Courage. See if you can solve their riddle.

USING THE GEMS

While in the Dungeon, should a player possess a Gem, he may get to "see" a map of the Dungeon. Gems are found on the Item Screen and are activated by the Control Pad and the A Button just like the torches and other special items. Used wisely, they can get you out of danger.

MAGIC

A smart party may be able to do great things with their weapons and fighting skills. But without the force of magic, the cause is all but lost. Casting spells requires both Magic Points and the proper ingredients. Learn the abilities of your party members well. Some characters are far better at casting spells than others. Keep a close eye on the remaining amount of Magic Points for each member, and the amount of ingredients the party has on the Herb Status Screen. You will find that you will have to use magic very sparingly in order to survive.

MAGIC POINTS ARE RESTORED AS YOU WALK

With every step some of the spent Magic Points are recovered. It is important to remember that the points are not recovered unless the party is moving. With proper management, a balanced party will always have a party member whose Magic Point total is nearly full.

THERE ARE EIGHT INGREDIENTS

ASH 2 GPs	The basic power of sulfur ash is illumination. It is used in several spells and is found in shops.	
GINSENG 5 GPs	Ginseng is an herb of the nervous system and is used to restore health and for its hypnotic properties.	
GARLIC 6 GPs	Garlic restores strength, dispels spirits, and treats disease. A very useful herb indeed!	
SILKWEB 3 GPs	Used in restraining or stopping magic. It is commonly used as a component of defensive spells.	
BLOOD MOSS 6 GPs	BLOOD MOSS is related to powers of speed and movement. It is also good for maintaining life. Check the shops for it.	
BLACK PEARL 9 GPs	One of the strongest components of offensive spells. Never run out of it.	
FUNGUS ?	A mighty herb! Fungus is poisonous and deadly to most enemies. Search well, it is very difficult to find.	
MANROOT ?	Manroot can not be found in any shops. Legend says it is found in the night of a new moon. Use Search.	

MAGIC SPELLS

There are 25 different spells which the party may use to complete their quest. Some of the spells can not be used at the start of the game, and some must be learned as the player progresses. Remember to place new spells in the magic book in the Registry.

TRAMMEL

The western moon of Britannia. This moon decides when the gate will open.

FELUCCA

The eastern moon of Britannia. It will determine where you go when you travel.

The Moongate is a teleporting portal through which the party can travel vast distances. They open and close depending on the various phases of the two moons of Britannia, Trammel and Felucca. The location where these portals will take you is determined by the precise position of EACH moon. For example, if Trammel is in phase 1, and Felucca is in phase 3, the party can travel from gate 1 to gate 3. The gates will take you very far!

To master them, you must demonstrate by your actions that you are the living embodiment of them. If you flee before battle, your Valor level will drop. Should you lie, your level of Honesty will drop. Learn the relationship of these Virtues and your actions. With the help of your seven companions you may be able to piece the riddle of the Stones, Runes, and the Three

Principles of Love, Truth, and Courage to be the one true Avatar. Hawkwind, and Lord British along with many of the people of Britannia will be there for your aid. Question everyone. Remember your Virtues. Leave no stone unturned. The repercussions of your actions may have effects which are not clearly seen at the moment. Beware, the agents of evil will attempt to turn you from your path. You must learn every trick you can without deception or falsehood. Only Hawkwind can tell you exactly how well you are progressing. See him often. With his guidance you will be able to determine if the actions you are taking will lead you to success, or into the depths of despair.

THE TOWN OF HUMILITY

MAGINCIA

The inhabitants of Magincia are proud folks. All but one of them are monsters. They like to shroud their city in a mist of secrets. You will not find a Rune here. You will find answers also hard to get.

RESIST YOUR DESIRE TO FIGHT

Though the people of this town are monsters, and their apparent lack of cooperation can anger you, remember, Humility. You must not fight or you will lose Virtue. Seek a peaceful answer. The quest of the Avatar is hard.

TWO HIDDEN ROOMS IN TOWN

The rooms are well hidden. Study the map carefully. The answers are there. The chest you may open easily without fear of losing any Virtue like in other towns. You may have to be very careful where you walk though. Sometimes you may have to Sacrifice a little health to gain the treasures that you desire.

CASTLE OF TRUTH LYCAEUM

Here you will find a library and an observatory. There is a set of stairs that go down to the Altar. Only the Avatars may go there. Use the Telescope to get a good look at the world in which you travel. Every view is something new.

CASTLE OF LOVE EMPATH ABBEY

This is the Castle of Lord Robert. He will have a great deal of information about this Principle for you when you arrive. Again there is a stairwell that may only be used by the Avatars.

CASTLE OF COURAGE SERPENT'S HOLD

Lord Senti sits upon the throne here. Courage he respects above all else. The more that you learn about Courage from him, the more you will understand how it relates to four Virtues.

As you peer through the Telescope you will see spots of bright lights. Those are the buildings of Britannia. Have you been to all of them?

Speak to the Great Ankh. It will tell you of the Abyss and what you will have to do to reach your dream of Avatarhood.

Each Principle has an item that represents it. Here you can learn about one of them, and what perhaps it can do for you. Press on Avatar!

EIGHT VIRTUES SHRINE

Throughout Britannia there are Eight Shrines, one for each of the Eight Virtues. Whenever you have gained enough levels of that Virtue and have the corresponding Rune, you may attempt to enter the the Shrine. Find the Ankh. If you talk to it, the truth of that Virtue will be revealed unto you.

MOUNTAIN CAVE SERPENT'S SPINE

It is said that the entrance to the Serpent's Spine is deep within the mountains of Britannia. It is believed that the balloon is the only way to reach it. What secrets it may hold are still a mystery that has yet to unfold. Can you solve it?

I am blind.
Please count 2556P
and hand it to me.

Don't deceive people you buy goods from. They present you with the temptation to do so in order to make you fail.

GO TO THE CASTLE BRITANNIA TO BEGIN

Use the Moongate to get to the Castle Britannia. See Lord British there who will heal you if you answer "No" when he speaks about Health. Talk to Hawkwind often. He will keep you informed as to whether or not you are doing well in your quest for Virtue. If he says you need to try harder, think about what you've done.

GATHER ALL SEVEN COMPANIONS

Each of the seven companions is a specialist. Each has a quality that you can use to succeed in your quest. You can pick and choose who will accompany you in each portion of your adventure. If your Virtue is too low, you may not be able to recruit any companions. Think of a good deed.

ALWAYS WRITE DOWN INFORMATION

Some characters appear to "babble" when you first meet them. Their words make no sense. Later they may and if you do not write them down, you might forget where that character is and what was said. Then you'll have to start over again.

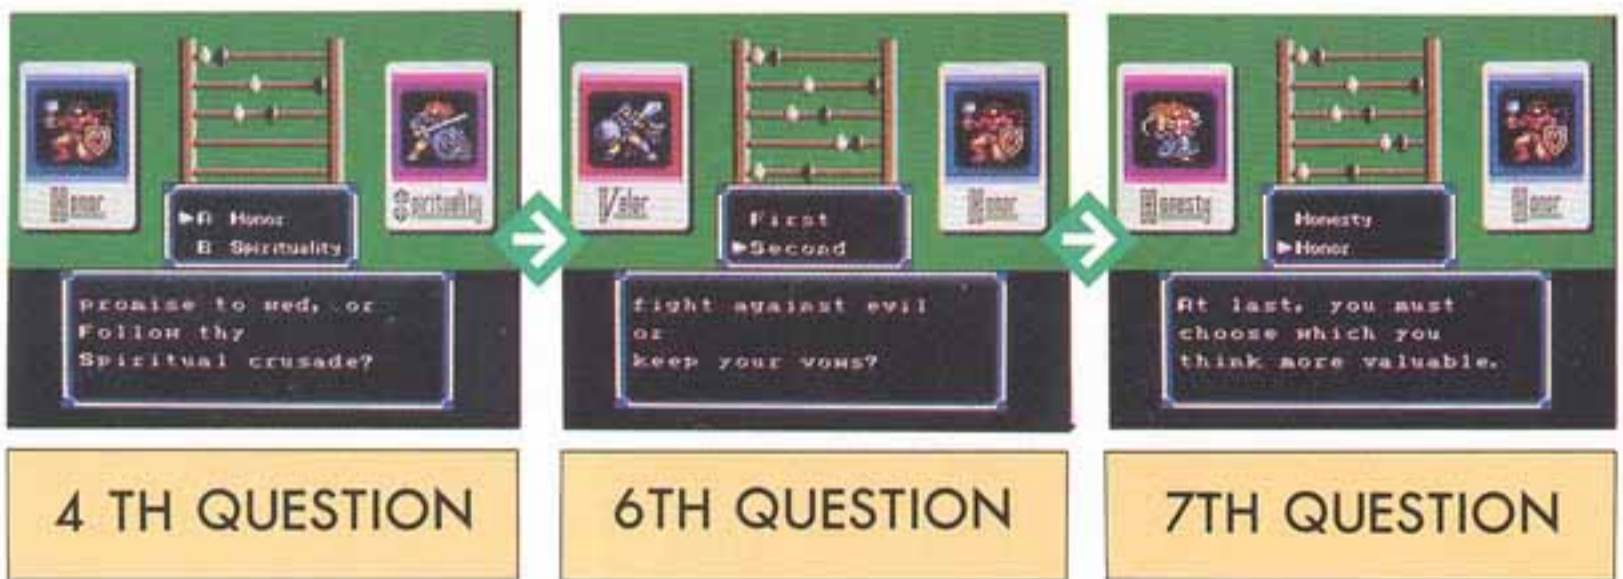

WALK THROUGH?

They are often difficult to detect. Sometimes you can actually walk through them without knowing it. Take your steps very carefully. Watch for subtle changes in the background.

START WITH A CHARACTER YOU LIKE

Hawkwind's cards determine what type of character you will start with. By some trial and error you will learn the way to get any character. The secret is knowing the character's PRIME Virtue. Here's how a Paladin is made.

TAKE SHIPS FROM PIRATES

Stand next to shore when you see a Pirate ship. If it comes next to you it will attack. If you win, it's yours! After a while you can collect several ships and leave one in each harbor around the world. Travel becomes easy.

WHERE'S THE BALLOON?

The balloon is hidden somewhere in the depths of the mountains. You must go through a particular Dungeon to find it. Study your maps carefully. Have you missed any places? Try looking for more secret doors.

CAREFULLY CHOOSE YOUR MEMBERS

You can only take four characters at a time. Make sure the ones you have can do the job you want them to do. Heavy on spell casters, and low on fighters is a risky party. Try to balance them.

Fighter, Paladin, Tinker, Ranger. This combination

is a heavy weapons unit. It will be expensive to equip with all the armor and projectile weapons. It is very powerful but can come up short for healing MPs. The Fighter and Paladin should lead with the Ranger in the rear.

Paladin, Fighter, Druid, Mage. This is the best balanced party.

The Paladin and Fighter give good up front protection, while the Druid and the Mage provide plenty of magical support. Keep the Mage in the back for protection.

Druid, Ranger, Mage, Shepherd. This is a very heavy magic

group that can provide a great deal of magic experimentation. It will run out of Herbs often, and lacks good up front strength. Not a strong defensive unit. It could get into trouble.

TWO MOONS AND MOONGATES

The exact phases of these two moons will provide passages to the Black Stone and the Shrine of Spirituality. The pictures at the right will give you some clue as to how to find these two places. Remember, the left moon opens the door, the right one tells you where you go.

SHRINE OF SPIRITUALITY

THE BLACK STONE

FUNGUS AND MANROOT

Fungus and Manroot are only found each in one spot. Neither can be found in shops or when the moon is out. The sextant and a clue in a town will help you find Fungus. For Manroot you must assemble several clues.

FUNGUS

MANROOT

GET GOLD FROM THE DUNGEONS

The treasure chests in the Dungeons replenish themselves every time you leave. This way you can go and re-collect the same chests over and over again for easy money. Watch out, though, the monsters also replenish themselves too.

DON'T USE EVIL POWER

If you accidentally get the Skull of Mondain, DON'T use it. You will pay for it dearly losing so much Virtue that you may not be able to win the game. Reset your game and try again.

COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna
- Relocate the NES with respect to the receiver
- Move the NES away from the receiver
- Plug the NES into a different outlet so that control Deck and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful:

How to Identify and Resolve Radio-TV Interference Problems.

This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 004-000-00345-4.

⚠ WARNING ⚠

DO NOT USE WITH FRONT OR REAR PROJECTION TV

Do not use a front or rear projection television with your Nintendo Entertainment System® ("NES") and NES games. Your projection television screen may be permanently damaged if video games with stationary scenes or patterns

are played on your projection television. Similar damage may occur if you place a video game on hold or pause. If you use your projection television with NES games, Nintendo will not be liable for any damage. This situation is not caused by a defect in the NES or NES games; other fixed or repetitive images may cause similar damage to a projection television. Please contact your TV manufacturer for further information.
