The Story of Ogre Battle

The days of Zenobia are growing dark and cold—evil is running rampant over the entire continent. Shadows of men roam the streets, whispering of the demise of their great King. The trusted Sage Rashidi fell prey to the evils of power, and in its grip, Rashidi slew Gran, the mighty King. Rashidi then joined forces with Empress Endora, and their reign of terror spread to the entire continent. Thus, the Zetegenian Empire was born.

Your Mission

It’s been nearly a quarter of a century since the reign of terror began. The Empire rules with neither justice nor compassion. The last remaining members of the rebellion are gathering on the outskirts of Sharom. The rebellion is greatly outnumbered by the mighty Empire, and there seems no way to defeat such an evil power. However, secrets carried through the wind tell of a great Wizard, “Warren” who may be willing to help you. Choose your path wisely, listen carefully to the people, and gain their confidence. If you are not careful, all will have been in vain. You will have toppled an evil Empire, only to start one of your own.

Basic Steps

1. Choose Location
   Areas displaying a flag have been freed, and those with Swords are ready for you to explore and liberate.

2. Deploy unit
   Once you’ve arrived in an area, deploy several units—some to liberate towns and some to fight enemy troops.

3. Defeat enemy’s unit
   Upon encountering an enemy unit, you will enter the Battle Screen. The side that inflicts the most damage wins.

4. Liberate towns
   Liberate towns to receive a healthy tribute. Enemy troops can retake a town, though, if you don’t watch it!

5. Beat the boss
   When entering a new area, the Boss’ location is displayed. When you think your forces are ready, go for the boss!
**ACT. I**

**HOW TO START THE GAME**

This game is controlled by choosing Icons. Use the Control Pad to move the cursor to an Icon and press A Button to select it. To reset the game, press L, R, Select and Start.

**Super NES controller**

- Left Button
- Control Pad
- Select Button
- Start Button
- Right Button
- X Button
- A Button
- B Button
- Y Button

**STEP 1**

**Turn on your Super NES**

Please make sure the power to your Super Nintendo Entertainment System (Super NES) is off. Insert the *Ogre Battle* game pak and turn the power on. You will then see the opening screen. Here, you may choose to start a new game, or if this isn't the first time you've played *Ogre Battle*, you may continue working on a previously saved game. Use the Control Pad to select an option and press A Button to execute it.

**STEP 2**

**Let's make a Hero**

The character you will play is the head of the rebel forces, and is also known as the Opinion Leader. Choosing the **New Game** option at the Title Screen will call the wise man Warren, who will perform a character reading of your personality with Tarot cards. Warren will ask you six questions, as well as your sex. Based upon your answers, your hero’s character will be formed.

**STEP 3**

**Choose the first Location**

A menu is displayed upon first entering the **Main Map** screen. Here, you may choose Edit Units, Monitor and Data. Press B Button to remove the menu. Move the cursor to an area and press A Button. You may fight in areas marked with a sword. Areas which have already been liberated are marked with a flag. Press X Button to display the menu again.
**ACT. 2**

**BEGINNING THE BATTLE**

A worthy leader has been created to lead the rebel forces to victory, and that leader is you! Let the battle begin...

**STEP 1**  Let's move your unit

Click on the Unit Icon and select **Move**. The cursor then becomes a flag. Place the flag on the location you wish to move a unit to and press A. In later stages, you will use this command to move several of your units. When you have many units moving at one time, you may click on a unit and choose the **View Destination** command to view where that party is headed.

**STEP 2**  Liberate cities

Liberating a city is as simple as moving a unit. Place a flag on the city with the **Move Unit** command.

Upon the unit's safe arrival, the city will be liberated.

As a reward, you will have a chance to pull a Tarot card.

Valuable information may be received after taking a card.

**Game Play Fundamentals**

**Part 1**

**Icons on the World Map**

- **Edit Units**
  Use this command to change the members in each party. (See page 12).

- **Option**
  Here, you can change the sound, game speed, and animation.

- **Data**
  You may save your progress into one of three files (from the world map only!)

**Icons on the Stage Map**

- **Move**
  This allows you to set a destination for a selected unit.

- **Tactics**
  The way battles are fought can affect your reputation.

- **Edit**
  This command takes you to the Edit Units screen.

- **City Icon**
  To find out the details of a certain city, move the cursor to its icon and press the A button.

  **City's Name**
  **Population**: the number of people to liberate.
  **Morale**: the general mood of the townspeople.
  **Friendliness**: compassion for the rebel cause.
  **Money**: your tribute amount, after liberation.
  **Shop**: this will appear if the town has a shop.

**Reputation meter**

This meter shows what the people of the area think of you. You may play * Ogre Battle* without regard for the opinion of the populace, but the storyline will be adversely affected if the meter falls too low.
**ACT. 2**

**STEP 3** Discovering Hidden Cities

Sometimes, your units will come across hidden towns. These towns can provide important information, so be sure to send a Unit to check out suspicious areas.

In the first area, check out the island in the north. A unit reaches the island, and a hidden town is found! Lans appears and gives you some valuable information.

**STEP 4** Let's Beat the Boss

Pay attention to the Boss' location when it is displayed at the beginning of the stage. When you feel that your forces are up for the challenge, head for the Boss!

Warren appears when you reach his castle. Make sure your Unit is ready to fight. Each member will fight automatically.

**Game Play Fundamentals**

**PART 2**

**How to Look at the Unit Box**

During battle and in the Edit Units screen, your units will be displayed in the following Unit Box.

- **Character**: Each type of character has a unique miniature icon.
- **Life meter**: This indicates how much of the total Hit Points remain.
- **Hit point**: This shows the maximum Hit Points for this character.
- **Unit leader**: The leader of a Unit is designated with a cross symbol.

**Icons on the Battle Screen**

Although parts of the battle scenes are controlled by the computer, there are a few options you do get to decide on. Press B Button to bring them up.

- **Tarot Card**
  - Each card has a special use, which will come in handy.
- **Animation**
  - With the animation on, you can see each character attack.
- **Retreat**
  - If you're weak, this allows you to escape from the battle.

**Tactics**

- **Best**: Attack the enemy that can be hit most effectively.
- **Strong**: Attack the opponent with the most Hit Points.
- **Leader**: Attack the leader of the unit first.
- **Weak**: Attack the opponent with the least Hit Points.
EDITING UNITS

Although it is entirely possible to play *Ogre Battle* with the units as they come, it is best to customize each party for maximum effectiveness. Some characters fight better together than others.

**STEP 1: Viewing Status**

Select the *Edit Units* icon while on the Main Map screen to get to this menu. All characters will be displayed—those in units and those which are in your character pool.

**ALL UNITS PRESENT AND ACCOUNTED FOR**

Use the Control Pad to select the unit you wish to view. Within the unit, you may select and view each character. Try doing the same thing with the rest of your Units.

---

**Game Play Fundamentals**

**ICONS ON THE EDIT UNITS SCREEN**

- **View status**
  - You can view the characteristics of the unit members.

- **Add character**
  - Allows you to add a member to a unit, or create a new unit.

- **Remove**
  - Use this command to remove a character from a unit.

- **Formation**
  - This allows you to change the positions within the unit.

- **Erase**
  - This permanently removes a character from the game.

- **Change leader**
  - This allows you to change the leader of a unit.

- **Change Class**
  - When characters reach higher levels, they may be able to change their class to one of an equal or more powerful being.

- **Items**
  - Selecting this icon brings up the next Item menu, from which you may choose *Use Item*, *Equip Item*, *Sell Item*, *Drop Item* or *Sort Items*. There are over 200 Items to be found in *Ogre Battle*, so this menu will be very important. (See page 23).
**Removing/Adding Characters**

The steps you take to remove or add a character are similar. Read on, fearless warrior, for all the details.

**STEP 2**
First, highlight the unit you wish to change, then press A.
Next, select the character you wish to add or remove.
Removed characters end up back in the character pool.

**STEP 3**
Make new Units

When a unit leader is removed, the unit is disbanded. New units may be formed with the Add Character command.

First, highlight a unit by using the Control Pad.
Select and remove the unit leader to disband the unit.
Add a new member from the character pool to be the leader.

**STEP 4**
Change unit formation

You may position the characters any way you like within a unit. Check each character's front/back attack skills to decide which row is best. While starting out, keep the leaders of your parties in the back row to protect them from attacks.

From the old formation, select characters with the A Button
Place them in the empty box to create a new formation.

**Game Play Fundamentals**

**PART 4**

**CHARACTER SCREEN INFORMATION**

- **Present level**
  The experience level increases as the character gets stronger and more skilled.

- **Str (Strength)**
  The higher the character's Strength, the more damage he will inflict in battle.

- **Agi (Agility)**
  Characters with high Agility will successfully hit opponents in battle more often.

- **Int (Intelligence)**
  This affects your ability to cast and protect against spells.

- **Cha (Charisma)**
  The Charisma level determines how well a character is able to lead units.

- **Ali (Alignment)**
  The higher a character's Alignment is, the more he or she cares for others.

- **Luk (Luck)**
  A lucky character will be able to avoid attacks more often, and has a better chance of finding items in defeated enemy units.

- **Leader OK**
  Some character types cannot be unit leaders regardless of their Charisma.

- **Item equip**
  This shows if a character is equipped with an Item, and what type it is.

- **Character size**
  Characters are either large or small. A unit may contain five small characters, or a combination of large and small. Each large character takes up the space of two small ones.

- **Character name**

- **Character's class**

- **Hit points**

- **Cost**
  This is the cost of deploying this character and its daily wage.

- **Next level**
  Characters gain experience points after a battle. This shows the points needed to advance one Level.

- **Front/back**
  Characters attack differently on the front line then when in the back.

- **Move**
  Shows the terrain or method of travel this unit uses most effectively.
**LET'S SAVE THE DATA**

Once you've spent some time organizing your units, it's a good idea to save your data on the Main Map screen.

**BUILDING THE BEST SET OF UNITS**

**TYPE A**
City-Liberation Unit

To build a good reputation with the people of the area, liberate cities with a party of high Alignment.

**TYPE B**
Enemy-Attacking Unit

Characters of lower Alignment and those with muscle should go out and take care of the enemy troops.

**TYPE C**
City-Defending Unit

Place balanced units in liberated cities. Use units with strong characters in the front rank to ward off physical attacks.

**TYPE D**
Terrain-Battle Unit

Build parties with characters of a common terrain type, and send them to fight in the most suitable areas.

---

**Game Play Fundamentals**

**WHAT AFFECTS YOUR REPUTATION?**

Although you may play *Ogre Battle* any way you'd like, a good reputation can ensure help from the people of the area.

**ALIGNMENT**

When liberating towns, the Alignment of the liberating unit should be higher than the town's morality level.

**YOUR REPUTATION**

Finishing the game with a good reputation will be one of the factors in getting the best ending to the game.

**CLASS COMPATIBILITY**

Characters in a unit with very different Compatibility cannot fight to their maximum potential.

**CHARISMA**

A high Charisma level means that you are a good and effective leader, and will raise your reputation.

To ensure that you're getting the most effectiveness when building units, try following these guidelines. See page 22 for more hints on unit-building and making battle plans.
NEXT BATTLE!

Congratulations fearless Leader, you’re doing well! Now it’s time to take your units out and explore the Forests of Sharam. Who knows what evil lurks beyond the trees...

Check Map & Form a Plan

A well thought out plan is essential to your success in Sharam. Press the R Button to zoom out from the Area Map screen to get a better look at the area as a whole.

In addition to the visible cities and temples, take note of the hidden city and temple in this area. They may contain exclusive information.

Deploy All Units

Below is a step-by-step suggestion of how to go about completing this area efficiently. As you can see, customizing each unit for maximum effectiveness will prove to be a worthwhile effort. In the beginning, all units but one should be deployed from the base, each with its own unique mission to accomplish. This is expensive, but will be worth it.

Send flying units to the cities of Abdella and Valna.

Send a group of units to Valikesh, where the enemies will be advancing.

Remember to leave one unit guarding the Rebel base.

Press the R Button to zoom out and watch the units move.

When a unit reaches a city, the “Liberation” message appears.

You’ll be notified when a unit reaches a general location.

Press the R Button to zoom in and examine your position.

Choose another city for an available unit to liberate.

Press the L Button to determine which units are moving.
Game Play Fundamentals

CHECK WHICH UNITS ARE MOVING

On the Area Map, press L Button to view deployed units. If one is finished moving, select the unit from the list, press A Button to zoom in on it, then send it to a new location.

ICONS ON THE STAGE MAP 2

Deploy Unit
Deploying units in this area can be done as shown on page 19.

Edit Unit
You may edit units specifically with this area in mind.

Tarot Card
You may learn about each Tarot card's effect at this time.

Income Projection
This shows your projected income. At noon, you receive money from each freed town, minus the cost of the units you have deployed.

ICONS ON THE CITY 1

Recruit Character
While a unit is in a city, you may recruit members into that party, provided that there is space.

Exchange Character
If two of your parties are close enough to each other, you may trade characters.

Shopping in Valna

The town of Valna is a shopping paradise. For those with some cash, nearly anything can be bought.

Select the Unit icon from the Area Map screen.

When in a town with a shop, the Buy Item icon will appear.

The available Items and each of their prices will be listed.

HINT TWO

Which Items Should You Buy?

This is the first shop you’ve happened upon, so don’t spend all your money in one place. If you’re not careful, you could go bankrupt. It’s not necessary to buy the more expensive Items right now. Stick with useful, inexpensive Items like Cure and Heal.

Take on the Enemy Units!

As your units go on their way, there are sure to be enemy units to fight. Keep in mind that the people don’t like a bully! Your reputation will suffer if you wipe out units that are weaker than yours. Fight the tough ones, and you’ll gain respect.

Check if this unit is stronger or weaker than yours.

Fight enemies stronger than you to gain experience points.

If Enemy units are weak, use one of your own weaker units.
**HINT THREE**

**Making Battle Plans**

Below are some hints which are especially helpful when you have units deployed out on the Area Map screen.

1. **Stay on the City**
   It's important to keep units in liberated towns in order to defend them. Also, characters can recover hit points as long as the unit stays in the city.

2. **Landscape Effect**
   Form units whose members have common terrain preferences, then send the mountain, plains and water units to areas in which they fight most effectively.

3. **Night or Daylight Battle**
   Characters of high alignment fight better in the day time, and those of low alignment prefer the night.

4. **Don't Be a Bully, Check Your Level**
   If a good reputation concerns you, be careful who you fight. If you must fight enemies weaker than your party, one option is to defeat only their leader.

**STEP 5**

**After the Battle - Part One**

If someone in your party has sustained grave injuries, you should try to restore their hit points as soon as possible.

- Select a unit on the field, and check each member's HP.
- Select the Item icon, and then select Use Item.
- If you have a "Cure" item from a shop, use it now.

---

**Game Play Fundamentals**

**ITEM ICONS EXPLANATION**

Press **X Button** on the Area Map screen to bring up a menu from which you may choose the Items icon. This menu allows you to perform a variety of functions.

- **Use item**
  - This icon displays a list of the Items you currently own.
- **Equip item**
  - Use this to equip characters with weapons, armor and charms.
- **Sell item**
  - If you're short on cash or have no use for an item, sell it.
- **Dispose item**
  - This allows you to permanently remove an Item from the game.
- **Order**
  - Use this to organize your Items in any way you would like.
- **Clean up**
  - This icon will sort your Items according to category.

**ITEM INFORMATION**

To get more information on an Item you are unfamiliar with, move the cursor to an Item and press Select. Also refer to the poster for more details.
**STEP 6**  
**After the Battle - Part Two**

Occasionally, a character will get wiped out in the course of a battle. You may revive those characters by taking them to the local temple. If the unit leader is slain, you'll have to have another member take over until you can revive the leader.

**HINT FOUR**

**IF A CHARACTER DIES...**

Before going somewhere far away from a temple, it's wise to buy a "Revive" item from one of the shops. Use this item to bring a character back to life, anywhere! If you can afford to lose the deceased character forever with all of their experience, then erase the character and recruit a new one in a nearby city.

**PART 8**  
**Game Play Fundamentals**

**ICONS ON THE CITY 2**

**Revive Icon**

When you bring a slain character to a temple, the Revive icon will be available. This service will cost a pretty penny, though!

**STEP 7**  
**Surround the Boss' Castle**

Once you've completed the immediate objectives of the stage—liberating towns, collecting useful information etc.--choose a group of units that you think are ready and launch an attack on the Boss!

**STEP 8**  
**Fighting the Boss' Unit**

Remember the hidden city on the island back in the first area? You met Lans, an old friend of King Gran who was very upset at the king's assassination. Now his recruitment is helpful.
After Beating the Boss

Congratulations, Great Leader! The evil oppressor of Jindark has been vanquished. It was not necessary to use Lans in your attack on Usar, but as you can see, his assistance was very helpful. Keep this in mind as you progress through the game. There are many more persons whose information and help could be essential to your success. Follow the steps below when in between each major area.

1. It's cause for celebration, but there is work to be done.
2. Next, it's time to return to the Main Map screen.
3. Choose the Edit Units icon to view all of your units.
4. Change the class of any characters who are now eligible.
5. Don't forget to save your progress with the Data icon.
6. Back on the Main Map screen, what's the next step?
7. After each area, return to areas you have already visited.
8. There will be new clues to find.
9. Return to the Main Map anytime by choosing this new icon.

Game Play Fundamentals

Icons on the City 2

Return to map

Often you will need to return to previously completed areas to pick up more information. Press X button on the Area Map and you will be able to choose the new icon, Return To Map. Remember, after the Boss has been defeated, you can no longer collect tribute money from the towns in that stage, so don't return expecting money from them.

Hint Five

When Neutral Characters Appear

You will notice that occasionally a neutral character appears in battle. If you quickly press A Button at the start of the battle, you will have the option of recruiting that character into your own party.
Now that you have completed the first two stages of *Ogre Battle*, you should have all the basic skills necessary to complete the rest of the game. Don't think it's going to be easy though. This area, Rashom District, is fraught with dangers and holds many secrets. Below are some tips to get you through the area. Some of the following steps can only occur if your Reputation Meter is high enough, so if you are having trouble, try backtracking and building up a higher reputation.

1. **Deploy Your Forces**
   Once again, don't hold back your units. Deploy all but one party, leaving that one to defend the Rebels' base.

2. **Fight in the Center**
   Send most of your units down the center path to meet the enemy forces.

3. **Visit Yulia**
   After liberating Chang'Ga and Bah'Wahl, head for the hidden temple in the southwest to meet Yulia.

4. **Find Canopus**
   After Yula gives you the Wing of Victory, return to Bah’Wahl where you will meet Canopus. He will join your quest.

5. **Defeat Gilbert**
   Use Canopus’ unit to fight Gilbert. After the battle, they will reconcile their differences.

The center area on this map is a good tactical position for most of your strong units. Deploy units with flying characters to hard-to-reach places like Jindark.
Pogrom Forest is a vast, dark, forested plain, and is haunted by many troubled spirits. You will need all of your cunning to get through this stage. You can best prepare for the long trip to the enemy headquarters by building units that are of high Alignment and that use clerics as their leaders. The undead characters of the forest can only be defeated by white magic tarot cards, a white magic weapon, or the spells of a cleric. Save two or three of your units to use for flying to the cities which are off the beaten path.

In this stage, the Southeast and Northwest corners are where you’ll want to send your flying units. Make sure their alignments are high before liberating the cities. Your other units should stay grouped for battle in the center of the map.

**Basic Steps**

1. **Add All Clerics & Deploy**
   Edit your units to include all of your clerics. Change their tactics to “Best” to attack ghosts and skeletons.

2. **Love your Enemies**
   As you go through the forest, use the Befriend command on any neutral characters; they will be very useful later.

3. **Team Attack**
   When you are ready to fight Kapella, place a group of units outside his castle. They can then attack in quick succession.

4. **Use “World”**
   Save any “World” tarot cards you have acquired for this battle and use them against Kapella.

5. **Get Mercury**
   After defeating Kapella, return to Pogrom Forest, go to Para, and receive an Item from Boltorano.
Stage 5: Full Moon

The title of the Lake Jannenia stage should serve as a clue to the dangers that await you within. The inhabitants will have many stories to tell you when you liberate their cities, but look out for one particular inhabitant named Sirius. He may seem friendly at first, but everything he has to say is meant to mislead you. You'll meet him again at the end of the stage, at which time you may repay him for his dishonesty!

Basic Steps

1. Use the Undead
   Put your undead characters in the front lines of your fighting units—they can absorb physical damage.

2. Meet Sirius
   His name is Sirius, but he's trying to play a pretty nasty joke on you! Don't fall for his plot to destroy the rebels.

3. Get Rune Axe
   A monk at the Temple on the east edge of the map will give you a white magic weapon. Use it on the boss.

4. Daytime Fight
   Because of the Boss' canine condition, visiting him at night is a bad idea. Go during the day.

5. Use Magic
   A Wizard's unit with Undead characters in front will be particularly effective on the Boss.

After liberating most of the satellite towns, circle the North edge of the lake. It will be difficult to get to the Boss' hideout on the protected island, so take a group of units across the bridge at the same time.
STAGE 6: GLASS PUMPKIN

Deneb’s Garden is a haven for monsters. Deneb herself is a beautiful but evil witch who has been performing experiments on humans in the district. The locals are wary of her, but she has plenty of Imperial troops on her side which will try to keep you from rescuing the citizens. When you defeat Deneb, you’ll discover her true nature, and you’ll have to decide whether or not to let her go.

Basic Steps

1. Follow the Road
   There is a path straight through the mountains to Deneb’s city. You should follow this path to reach her quickly.

2. Rumors Fly
   The people around Deneb’s lair will tell you all about her evil ways. They’ll be thankful to be rid of her.

3. Jack-O-Lanterns
   Deneb has pumpkin-headed henchmen to protect her. Their attacks are strong, but hers are fairly weak.

4. Forgive Deneb?
   After you defeat Deneb, she will beg for mercy. Say no, and your Reputation will rise.

5. Deneb’s Mission
   Return to Valparin and Deneb will ask a favor of you. She’ll also give you a Black Pearl.

In this stage, there are some hidden items to find, but they are not shown on the map. Explore! You are bound to find them sooner or later, but don’t get too distracted on the way to Deneb’s place.
There are many ways to reach the last stage of *Ogre Battle*, but following the chart at the right will help you take the smoothest route to the finish. Since your Imperial enemies are stronger in each consecutive stage, it's also the best way to advance your own level. Furthermore, keep an eye out for the four hidden maps as you make your way through the game!

---

**HINT SIX**

The Legend of *Ogre Battle* says that the four gods of the Sky Islands are alive and waiting for you to visit them. To reach their floating worlds, you must have the "Brunhild" sword. Use it to discover each of the four Chaos Gates. The gates are passages to the floating worlds of the gods. Look for them in out-of-the-way places: between mountains, on small islands, etc.
TRUE ENDING!?

The course of *Ogre Battle* is as diverse and challenging as you wish to make it. With 12 different possibilities, the ending will prove to be no less unique or unpredictable!

**CHECK 1** Your Reputation Meter

Finishing the game with a full, or near full, reputation meter is just one of the criteria in getting the very best ending.

**CHECK 2** The Hero's Parameters

The maximum Strength, Agility and Intelligence is 255, and the maximum Charisma, Alignment and Luck is 100.

**CHECK 3** Collecting Important Items

Seeing the best ending also depends upon discovering all of the special treasures and items scattered throughout the game.

**CHECK 4** Finding Important Characters

As important as finding hidden items is finding and talking to all of the various characters along the way. Many key characters must join your forces in order for you to reach the best ending.

GOOD LUCK!

Our Consumer Service Department is in operation from 10:00 A.M. to 5:00 P.M., Pacific time, Monday through Friday. If the Enix Service Representative is unable to solve the problem by phone, he will provide you with a return authorization number. Simply record this number on the outside packaging of your defective PAK and return your PAK FREIGHT PREPAID AND INSURED FOR LOSS OR DAMAGE together with your sales receipt or similar proof-of-purchase within the 90-day warranty period to:

ENIX America Corporation
2070 151st Place N.E.
Redmond, WA 98052-5522

This warranty shall not apply if the PAK has been damaged by negligence, accident, unreasonable use, modification, tampering, or by other causes unrelated to defective materials or workmanship.

**WARRANTY LIMITATIONS:**

ANY APPLICABLE IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO 90 DAYS FROM THE DATE OF PURCHASE AND ARE SUBJECT TO THE CONDITIONS SET FORTH HEREIN. IN NO EVENT SHALL ENIX BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES RESULTING FROM THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTIES.

The provisions of this warranty are valid in the United States only. Some states do not allow limitations on how long an implied warranty lasts or exclusion of consequential or incidental damages, so the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
